  <button class="ui blue submit button">Login</button>
</form>
```

Routes I

index.html

signup.html

routes.js
```
router.get('/', accounts.index);

router.get('/signup', accounts.signup);

router.get('/login', accounts.login);
```

login.html

Accounts Controller

```
index(request, response) {
  const viewData = {
    title: 'Login or Signup',
  };
  response.render('index', viewData);
},
```
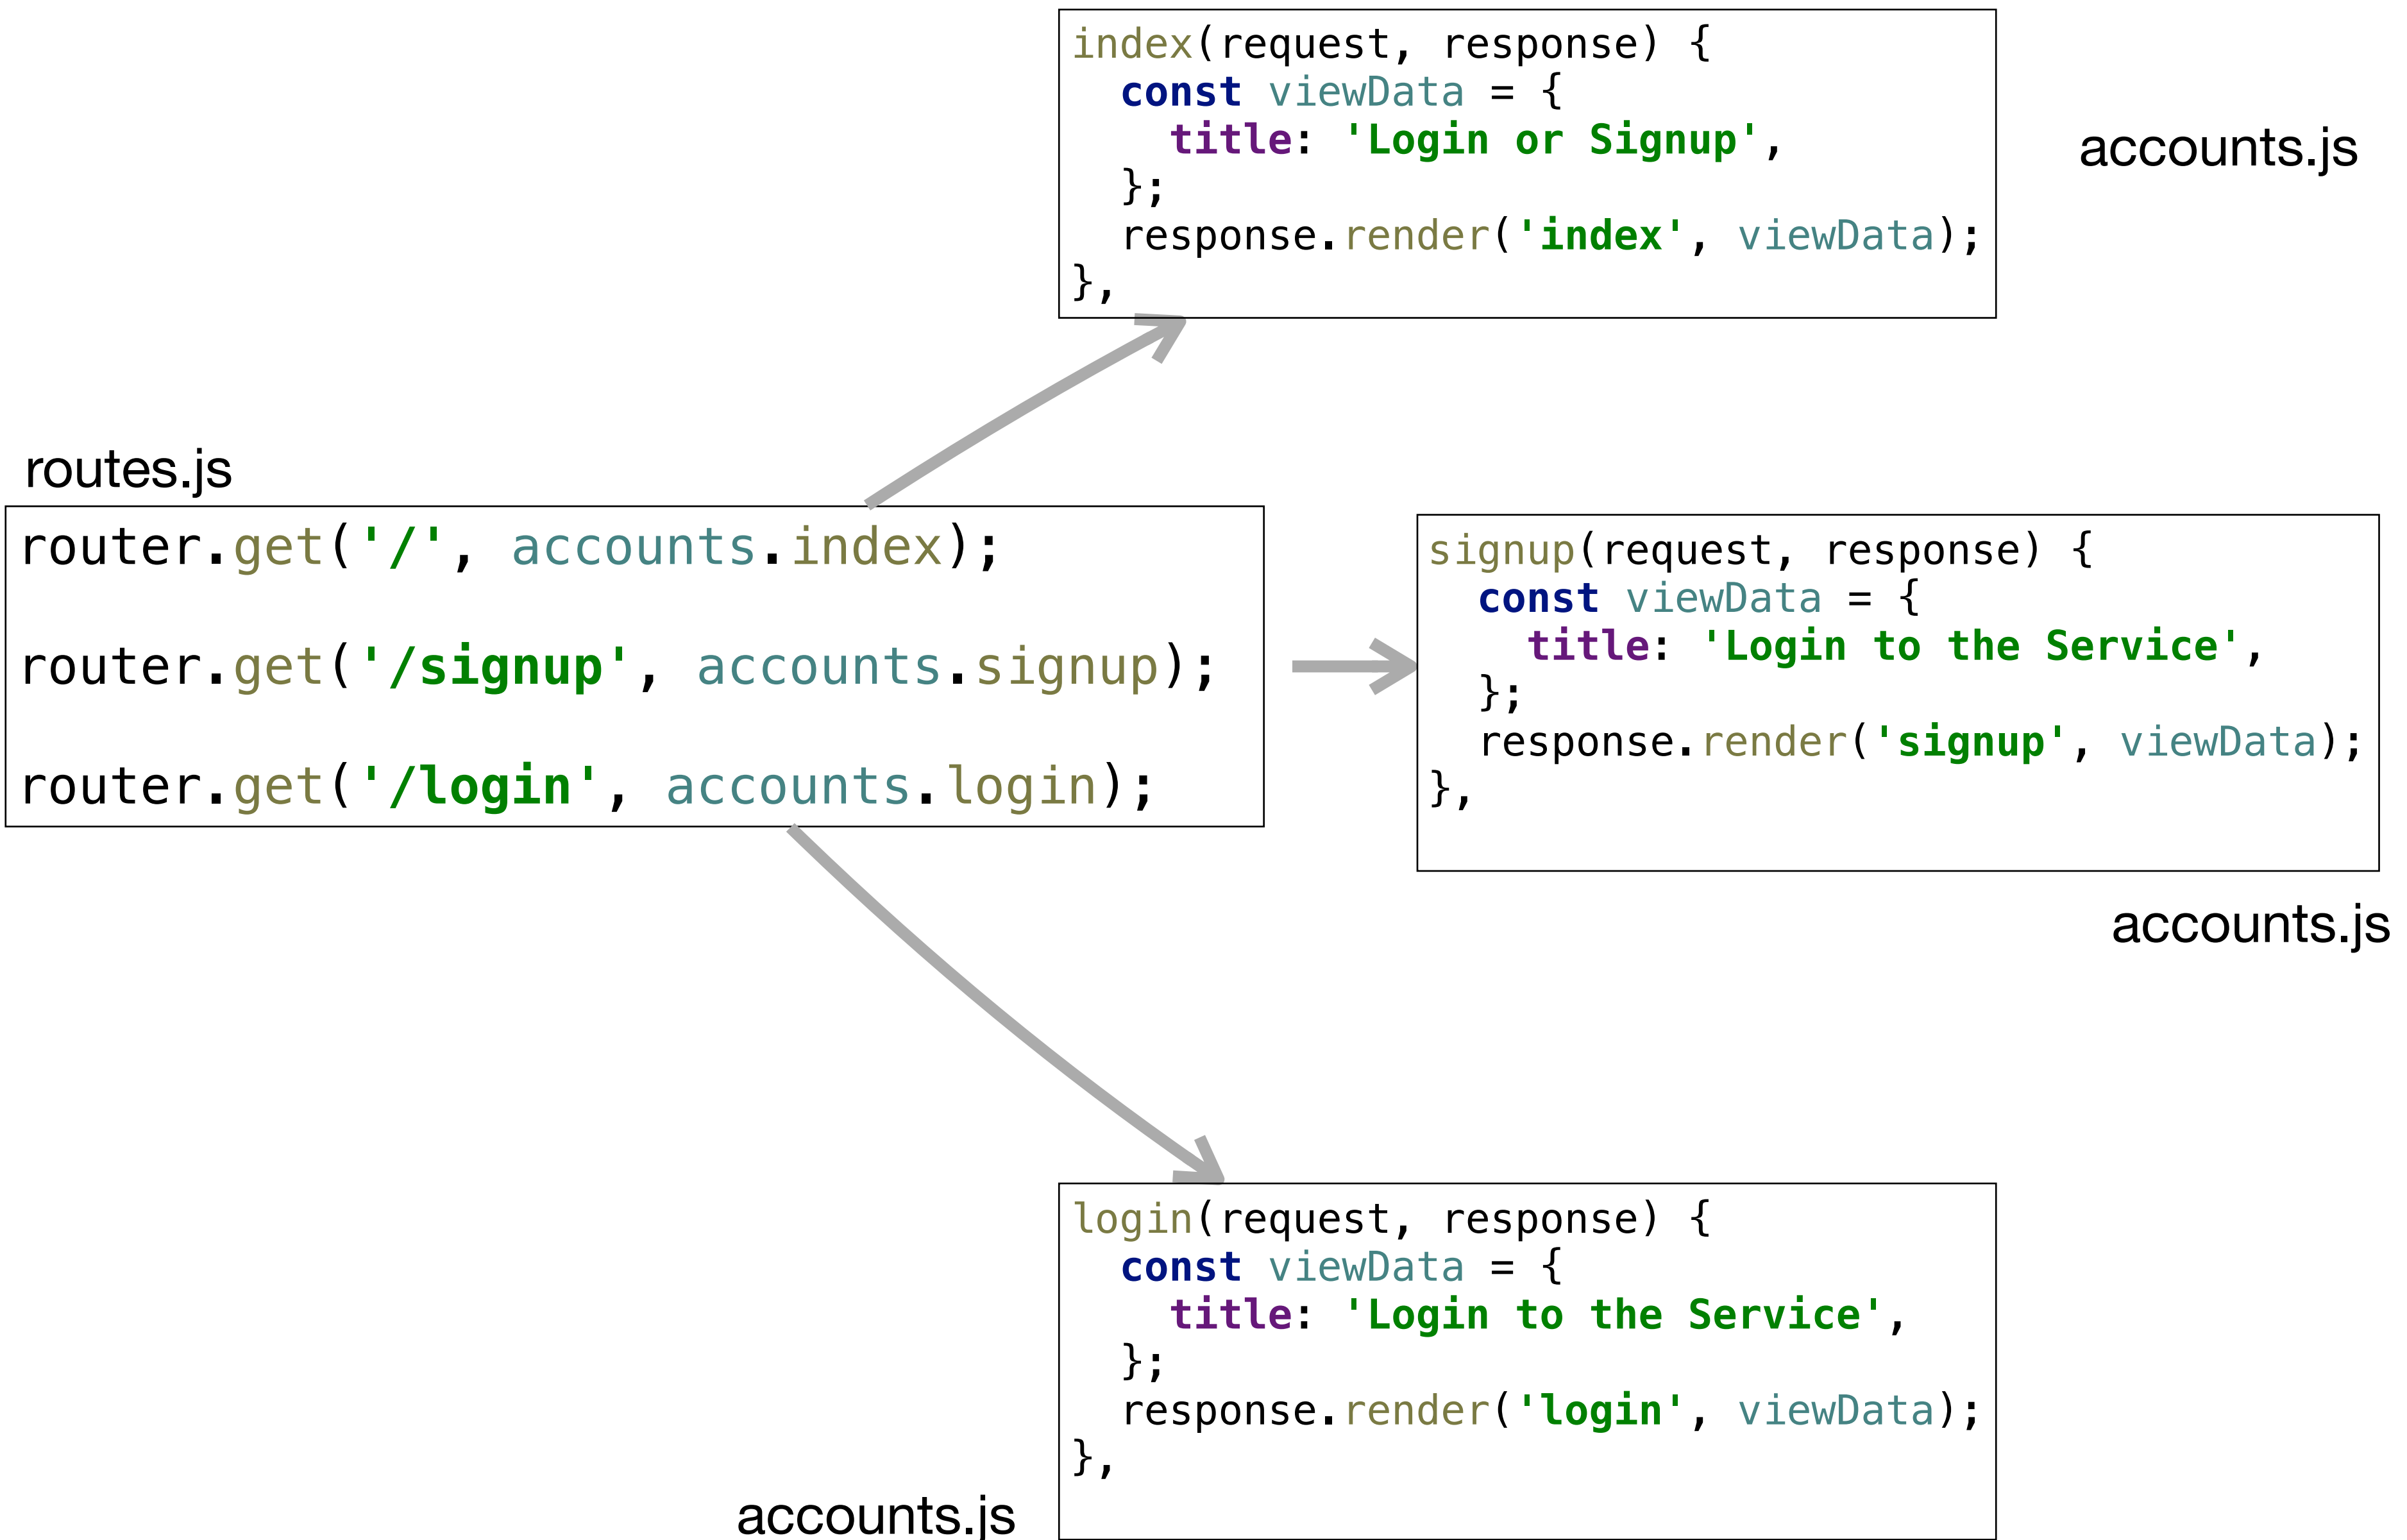

accounts.js

```
router.get('/', accounts.index);

router.get('/signup', accounts.signup);

router.get('/login', accounts.login);
```

```
signup(request, response) {
  const viewData = {
    title: 'Login to the Service',
  };
  response.render('signup', viewData);
},
```

accounts.js

```
login(request, response) {
  const viewData = {
    title: 'Login to the Service',
  };
  response.render('login', viewData);
},
```

accounts.js

Routes - II

Register a new
User with the
application

routes.js

```
router.post('/register', accounts.register);
router.post('/authenticate', accounts.authenticate);
```

Check to see if a
given email/
password is
known to the
application
